Architecture

React + TypeScript

Screens, touch controls
and local player state

Capacitor Android

Vite build packaged as an APK

Canvas simulation

Pathfinding, waves
and automatic tower combat

Mobile Wallet Adapter

Separate wallet authorization path

Solana integration today

Implemented in source

Android MWA authorization
Desktop wallet fallback

Validation still needed

Wallet handoff on Seeker
A demonstrated Solana flow

Local combat stays independent of wallet transactions.

Current product scope

Played on Seeker

Maze placement

Wave combat

Gold, lives and enhancement

Planned or unfinished

Verified online scores

Payments and payouts

Prize pool and store release

Payments are disabled. No token or cash-out promise.

The next milestone

**A demonstrated Solana flow
and release acceptance**

Public source and asset rights review
